

# Dyva Agna

Frontend Engineer

Bandung, Indonesia

[dyvaagna@gmail.com](mailto:dyvaagna@gmail.com)

[Linkedin](#) [Github](#)

My name is Dyva, a frontend engineer with two years of experience building products at Telkom Indonesia, working with various stacks including React, Vue, and TypeScript. I keen to deepen my knowledge and learn new things. Currently learning more about React at Epic React by Kent C. Dodds (online course).

## Work Experience

### Frontend Engineer, Telkom Indonesia (November, 2019 - Present)

Assigned as frontend engineer to develop Telkom Indonesia's digital products. Currently assigned to project: OSS RBA. Past project: ChatAja, PalapaOne. Read more about Telkom Indonesia at: <https://www.linkedin.com/company/telekomunikasi-indonesia/>

## Projects

### Frontend Engineer, OSS RBA (April, 2022 - Present)

Developing the web platform of OSS RBA, a business permit and license submission platform by Ministry of Investment of Indonesia collaborating with Telkom Indonesia. Read more about OSS RBA at: <https://oss.go.id/>

- Bug fixing and adding new features
- Stack: Vue

### Frontend Engineer, PalapaOne (January, 2022 - April, 2022)

Developed PalapaOne's event management dashboard. Read more about PalapaOne at: <https://www.palapaone.id/>

- Work with a code repository that is not maintained for two years
- Bug fix, reduce layout shift in the UI, fix error feedback to user to be more noticable and understandable
- Refactor code, simplify logic and process, co-locate things, migrate Class Component to Functional Component to utilize React Hooks, remove Redux
- Improve productivity and development speed by configuring Webpack
- Stack: React, Redux, Material UI, Webpack

### Frontend Engineer, ChatAja (November, 2019 - December, 2021)

Worked on ChatAja's web app and javascript SDK. Read more about ChatAja at: <https://www.chataja.co.id/>

- Developed new features, improvement, and bug fixing on ChatAja web app
- Helped Product Owner and UI/UX Designer improving ChatAja web app experience and interface by giving feedbacks and participating in design review
- Developed and published ChatAja Javascript SDK on NPM, wrote documentation and helped clients debugging and solving their problems and needs
- Stack of ChatAja web app: Vue 2, Vuex, SCSS, Jest
- Stack of ChatAja SDK: Typescript, Esbuild, Jest

## Education

### Informatics, Brawijaya University (September, 2015 - September, 2019)

Undergraduate. Score: 3.43. Read more about Brawijaya University at: <https://www.ub.ac.id/>
